

# Inquiry Question

What are the learning strategies that are effective in helping students with a learning disability access the mathematics curriculum and demonstrate improvement in the learning of mathematics?

# Who is involved?

- central educators (Learning Support Services, Curriculum Services, Business & Learning Technologies)
- 7 school teams (incl. principal and other members of school staff)

# How will we do this?

- develop common understanding of math curriculum & the needs of the LD learner
- implementation & monitoring of strategies to support students identified with an LD to improve their achievement of mathematics curriculum
- collection and interpretation of student work samples & observational notes
